

DNA Group, Inc., Donates to AmeriCares, Giving Critical Aid to Japan

Raleigh, NC - March 21, 2011 - DNA Group, Inc., joins a growing list of US companies aiding Japan's relief efforts. Following Japan's devastating earthquake and tsunami on March 11th, DNA Group responded by contributing with a monetary donation to AmeriCares. AmeriCares defines themselves as "a nonprofit disaster relief and humanitarian aid organization which provides immediate response to emergency medical needs – and supports long-term humanitarian assistance programs – for all people around the world, irrespective of race, creed or political persuasion." AmeriCares is also an organization that is familiar to DNA Group. In 2010 after disaster struck Haiti, DNA Group chose to support AmeriCares as the organization to provide support and assistance to those in need because of their alignment with the company's core values – Teamwork, Integrity, Excellence and Attitude. DNA Group hopes this latest donation will reinforce the company's support of AmeriCares' humanitarian efforts, and will help the people in Japan as they recover and rebuild.

About DNA Group, Inc.

DNA Group, Inc. is a leading provider of OEM integrated solutions through engineering, manufacturing and logistics services. Based in Raleigh, NC, the company manages and operates subsidiaries:

Defond North America, a key supplier of electromechanical components, switches and electronic assemblies to OEMs the world over. An affiliate of Group Defond, the company produces over 1 million power switches and over 300,000 electronic and electromechanical assemblies daily.

Digital Switching Systems, a leading provider of reliable and unique electronic and mechanical switching solutions for the marine, transportation and industrial industries. The company continues to bring to the forefront state-of-the-art devices and software applications for remote, networked control of low voltage DC power applications through the DSS family of components powered by omni-BUS™. www.digitalswitchingsystems.com

DNA Resource, a leading OEM resource for specialized component manufacturing and sourcing. The company provides strategic guidance for OEMs throughout each stage of the sourcing process.

Sygnal Technology, an IP holding company which both develops and licenses technologies for consumer product applications and acts as an agent for specific technologies, including over-current and circuit interruption products.
